# Driving Sustainability with Salesforce Net Zero Cloud

protiviti®  
Global Business Consulting

In the face of global environmental concerns and regulatory pressures, businesses struggle to manage their sustainability metrics. Salesforce's Net Zero Cloud (NZN) offers a solution: enabling meticulous carbon footprint tracking and net-zero emissions strategy development. Protiviti assists organizations in adopting this platform, enhancing sustainable practices and contributing to global Environmental, Social, and Governance (ESG) efforts.

## Why engage Protiviti to implement Net Zero Cloud?

Protiviti ensures seamless integration of the Net Zero Cloud platform to streamline ESG metrics tracking and reporting.

Key implementation considerations include:

- Consolidated ESG Metrics Tracking: Centralized access enhances transparency.
- Real-Time Environmental Insights: Immediate data processing for timely decisions.
- Efficient Sustainability Reporting: Reduces redundancies, ensuring accurate reports.
- Big Data Analytics for Sustainability: Utilizes large datasets for strategic forecasting.
- Unified ESG Data View: Integrates diverse sources for comprehensive analysis.
- Data Integrity and Security: Keeps sensitive sustainability information secure.
- Operational and Analytical System Linkage: Connects frontline efforts to back-end analysis.

This approach not only meets regulatory requirements but also advances sustainable practices effectively.

## Protiviti and Salesforce Value

**Enhanced ESG compliance:** Protiviti's expertise combined with Net Zero Cloud facilitates adherence to sustainability reporting standards, ensuring regulatory alignment.

**Data-driven sustainability decisions:** Leveraging real-time environmental data helps organizations make informed, strategic decisions towards achieving sustainability goals.

**Efficient reporting processes:** Streamlined tracking and management of ESG metrics simplifies reporting processes and enhances transparency.

**Holistic sustainability view:** Integration of diverse data sources provides a comprehensive understanding of an organization's environmental impact and performance.

As a Salesforce partner since 2015 with over 200 completed projects and access to the largest talent network of three million practitioners through our parent company Robert Half, Protiviti is committed to deploying the right people with the right skills at the right time for your initiatives - bringing a highly differentiated end-to-end set of skills that can drive high-impact real value to the business.

## How we will win together with Net Zero Cloud
